

Brief Overview of Business:

Our company is engaged in the business of cotton processing and yarn manufacturing sector by way of Ginning of cotton and spinning of cotton yarn. The products manufactured at our Company include Cotton bales, cotton seeds and Cotton yarn. The company operates in two primary areas: cotton ginning and spinning. In the ginning process, it separates cotton fibers from seeds, which is the first step in preparing raw cotton for textile production. Following this, the company focuses on spinning, where the clean cotton fibers are turned into yarn. This yarn, produced in various counts and quality grades, is used by textile mills for weaving and knitting fabrics.

The company's product range is centered on cotton yarn, including carded and combed yarn, which caters to both domestic and international markets. Vivekanand Cotspin serves a wide array of industries that require high-quality yarn for fabric production, and its reach extends beyond India, with exports to other countries. The company operates spinning mills, utilizing machinery to ensure efficient production while maintaining quality control.

The manufacturing facility of our Company is situated at Rangpurda, Kadi of Mahesana District in Gujarat state which is close to the rich cotton growing areas of Maharashtra and Saurashtra (region) of Gujarat. The company has established a production capacity of approximately 4,550.51 tons of cotton yarn and 8,000 tons of cotton bales annually. Our plant is equipped with plant and machinery. The level of advancement determines the productivity of machines and labor, which in turn, determines the production and profitability of our Company. Our technical team in spinning is well equipped with modern spinning technology and processing techniques by virtue of which we are able to ensure quality yarn. Technology is a crucial aspect of the cotton yarn industry.
